Customer Reviews

"The perfect companion to tote when exploring the last real frontier on earth". -- Pacific magazine

--This text refers to an out of print or unavailable edition of this title.

An excellent general travel review of the Micronesian islands. There's so much to see and do in paradise, that it's hard to cover everything in one volume covering over thousands of islands (you can either count at high or low tide) and many, many square kilometers of pristine, and sometimes wild, open ocean. I enjoyed the layout, maps, food and drug choices, and listing some of the more significant sights, along with a touch of the local languages and customs. I recommend it for any traveller going through, especially if you ride on the Continental island hopper, and get off at each major airport for a 2-3 days visit. The book is also handy and fits nicely in a pack-sack. Good job, Author Levy.

As the author of the 1st, 2nd, and 3rd editions of this handbook, I'm very familiar with the subject matter and am pleased to see how Neil Levy has developed and improved the guide. All 70 maps

are now computer-generated and printed in two colors. Neil has broadened the scope to include more information on the upscale facilities, while expanding the ecological discussions. As a companion to my own guide Moon Handbooks South Pacific it's unmatched, and I recommend it to both travelers and serious students of Micronesia.
