Introduction To Criminology: Why Do They Do It?

Synopsis

Introduction to Criminology: Why Do They Do It? presents a comprehensive and integrated approach to introductory criminology. Acclaimed authors and professors Pamela J. Schram and Stephen G. Tibbetts skillfully connect criminological theories to real-life cases to help students better understand criminology fundamentals. They thoroughly introduce theoretical perspectives that explain criminal behavior and are most respected by modern criminologists, while illustrating the theories with real-life examples such as street violence and property crimes. This text also includes many contemporary topics that are not well represented in competing texts, such as cybercrime, hate crimes, white-collar crime, homeland security, and identity theft.

Customer Reviews

Your textbook is the best format I've seen for explaining the crime theories and matching criminals to those theories.--Sgt. Levi Miller

Your textbook is the best format I've seen for explaining the crime theories and matching criminals to those theories. (Sgt. Levi Miller)

This is actually a great read. I had to buy for a class, but I love reading this in general. I have a general interest in criminology and Law & Order SVU is one of my favorite shows- one of those people. This is an easy read even though it is so densely filled with information. Every sentence has new knowledge and at the same time it is very intriguing.

Needed this for class, the price was right for a student

It arrived in a timely order, and I had no problems in returning it when the semester was over! I'm a very satisfied college student, and the book was very useful for my course.

Loved this book! Thanks!

One of the best textbooks I have ever had to use for class. I usually don't take the time to read textbooks unless I have to, but the way the author wrote the book is EXTREMELY organized, relatable, and informative. I love this book.

Very informative, intriguing book that covers the subject thoroughly.

Item as expected!

Good
