A go-to for many

This is fairly good reference for anyone in the IH field. It is a good book to read just for reference that's all.

It is interesting Book for Occmed physicians and Industrail Hygienists, in assessing health hazards, risk assessments, and corrective measures to take.

I use this text often as a consulting industrial hygienist. Also great for CIH exam prep. It describes various industrial processes and their hazards.

This is a great resource for any Industrial Hygienist or safety professional. Breaks down common industrial processes into easy to understand poetential exposures and hazards. I use this book all the time. It is a great reference.
