The easy 41 page read sets you off in the right path by outlining basic skills and requirements, before detailing the finer skills one would apply to acrylic painting. It shows you techniques like stippling, where you use the tips of the brush to produce grainy, small spots. You'll pick up quickly, assuming you put in the time necessary. Author discusses and or defines basic technique used in acrylics providing a few tips here and there as well. Very few visuals are provided to clarify or demonstrate technique. Easy to read without a bunch of unnecessary verbiage. Provides a good basic overview for layering to achieve depth and natural looking results. I read this in bed one morning when not feeling too well and it was great for that situation as I didn't feel compelled to run and assemble all order to follow along. After reading, I think the next time one actively paints the principles discussed with will be easily recalled even if

subconsciously and will provide some broad direction for success with ones painting. A good read for entry level painters who have 15 minutes to kill while waiting for an appointment.

As the title suggests, this is a crash course covering just the basics of three types of paintings...still life, landscapes and portraits. It provides concepts of basic procedures and that is all. Would definitely benefit from more illustrations because it is rather difficult to understand what the author means sometimes. There are no specific exercises , or detailed methods to be utilized. I had trouble understanding some of his suggestions, especially those tips about using household paint. Just didn't understand what the author intends. There are better , more detailed books with tutorials out there. However, for just the basic broad concepts, some may find this useful.
