Diary Of A Mad Lupus Patient

Synopsis

Diagnosed during her high school years, the author decided to keep a personal diary of her confusion, fear, and challenges of being diagnosed with Lupus. Lupus, also known as Systemic Lupus Erythematosus (SLE) is a disease that can affect many different body systems, including the joints, skin, kidneys, blood cells, heart, and lungs. Lupus is more common in women than in men. Research continues to be done on finding a cure for this life-threatening illness. This diary records thoughts and feelings for being diagnosed, to understanding and accepting the reality of living life with Lupus.

Customer Reviews

Good insight into the daily life of a lupus. Kudos to the writer for sharing her journey.

Great book for comfort!

Read this book in 3 hrs. When I say it made me cry, OMG it made me ball... This book was as if she was writing my life out. My constant pain is real and I feel as though nobody really understands what I mean when I say that I am hurting. I am going to recommend this book to a friend who was just diagnosed, and I am going to read it to my family so that they can get a understanding of what I mean when I say I don't feel good, or that I am hurting. Because I often times feel as if they either don't believe me or that they just can't understand, because I use to be so strong. Thank you for your story.

Great book that shows the ups and downs of a lupus patient. Thank you for sharing your story

A must read!!!

Great Book!
