The New Weather Book (Wonders Of Creation)

Synopsis

A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series! Did you know the hottest temperature ever recorded was 134° F (56.7° C) on July 10, 1913 in Death Valley, California? The highest recorded surface wind speed was in the May 3, 1999, Oklahoma tornado, measured at 302 mph (486 kph)! The most snow to fall in a one-year period is 102 feet (3,150 cm) at Mount Rainier, Washington, from February 19, 1971 to February 18, 1972! From the practical to the pretty amazing, this book gives essential details into understanding what weather is, how it works, and how other forces impact it. Learn why storm chasers and hurricane hunters do what they do and how they are helping to solve storm-connected mysteries. Discover what makes winter storms both beautiful and deadly, as well as what is behind weather phenomena like St. Elmo's Fire. Find important information on climate history and answers to the modern questions of supposed climate change. Get safety tips for preventing dangerous weather-related injuries like those from lightning strikes, uncover why thunderstorms form, as well as what we know about the mechanics of a tornado and other extreme weather examples like flash floods, hurricanes, and more. When you've finished reading the book, you'll understand much better God's amazing design of Earth's weather system!

Mike Oard earned a master's degree in atmospheric science in 1973 from the University of Washington, and was a meteorologist with the National Weather Service beginning in 1973, and lead forecaster in Great Falls, Montana from 1981 to 2001. He has been researching topics within

the earth sciences for over 40 years, and continues to be a speaker and author in topics related to the weather and the Ice Age.

Love the worldview perspective of this book!

Very nice book

Bought it as a gift for "Angel Tree" requesting a weather book for school supplies. It is a nice book with good pictures and weather information. It is a hardback book and made a nice gift.

This book describes many weather topics. However it should not be considered a science text as it does not promote the scientific method. It cites biblical chapters and verse by way of explaining physical phenomena.
