# **Bug Out Vehicle: A Step-By-Step Guide On How To Build An Affordable And Quality Survival Vehicle To Evacuate Your Home In An Emergency Disaster Scenario**

## Synopsis

Figuring out how you can prepare the best possible bug out vehicle for any disaster or emergency situation can seem like a challenge, but fortunately, it is not an impossible challenge. Questions you must be asking yourself include:-What are some situations where I would need to use a bug out vehicle?-What qualities does a good bug out vehicle need to have?-What specific types of everyday vehicles are suitable for bugging out that I can afford?-What should I pack in my bug out vehicle?-What skills will I need for when I am out on the open road?-How do I maintain my vehicle for the long term? This book is going to answer each of these questions and more to make sure that you are fully prepared to bug out on a moment's notice when disaster strikes. By the end of this book, you will know how to take a normal everyday vehicle, how to equip it for bug out use, and learn the skills you need to safely drive yourself and your family out of a disaster zone during a catastrophe.

## Customer Reviews

Same as above. Good tips, without over accessorizing your vehicle to the point of being noticed to quickly by others

This was a good read and thorough guide on bugging out in a vehicle. It covers all the bases from why you need a bug out vehicle to how to choose a vehicle and how to actually bug out in it.

The first thing that happens while reading this book is the unexpected stimulation of wanting to go deeper into each of the different subjects. Unconsciously, you find yourself making lists, not only of the listed items but things you thought of while reading. Thanks Ron.

A lot of lifesaving information packed into this book. Many aspects that I never thought about. I recommend this book to everyone.
