## Customer Reviews

Full sized poster of the plantations of the Mississippi River. I'm not sure why there isn't a picture of the actual map, or more details. I ordered it knowing I could return it through prime if it was not what I wanted, but after paying \$75 in a local gallery for the exact same map, I figured it was worth a try. Needless to say, I returned the \$75 map - they are identical! Very beautiful and I can't wait to get it framed. It will definitely be a conversation piece.

I love the information. I think I am going to have to build another wall to hold it because it is huge! Its size makes the words easier to read, though. Great source of genealogical information.

This is a huge map of the plantations and owners of the land on the Mississippi River from Natchez to New Orleans. The map looks like it was done on old parchment paper with a decorative design around the outer edges. I had it laminated so my family could point out places with pins where our ancestors came from. Great purchase!

This is messed up. It shows a picture of a book. I expected a book. Not posters. No where does it say it's a poster. Really really mad!!!!!!

I have other books about the works of Adrian Persac. I love his work. It is a great book. I like almost all books about southern plantations.

## Informative

For those who enjoy poring over large maps, this one (54" x 34") names and locates all the plantations along the Mississippi River from Natchez to New Orleans in 1850. Taken from Persac's information, it's a fascinating geographical, historical and genealogical resource. The map even lists very small plantations along the river. If you like this, also get a copy of "Along the River Road: Past and Present on Louisiana's Historic Byway" by Mary Ann Sternberg. While that book only covers the distance between Baton Rouge and New Orleans, it's a great companion piece.

This map is beautiful and quite large. It could be framed and be a very interesting piece of art work on a large wall. It really blew my mind as to how many plantations there were and how they lined up on the Mississippi river. You can study it for days and still not have seen everything on it. A real piece of work. Must have taken forever to research all the information and then complete the map. WOW is the best way to describe it.
