# Hindu Myths: A Sourcebook Translated From The Sanskrit (Penguin Classics)

## Synopsis

Recorded in sacred Sanskrit texts, including the Rig Veda and the Mahabharata, Hindu Myths are thought to date back as far as the tenth century BCE. Here in these seventy-five seminal myths are the many incarnations of Vishnu, who saves mankind from destruction, and the mischievous child Krishna, alongside stories of the minor gods, demons, rivers and animals including boars, buffalo, serpents and monkeys. Immensely varied and bursting with colour and life, they demonstrate the Hindu belief in the limitless possibilities of the world - from the teeming miracles of creation to the origins of the incarnation of Death who eventually touches them all. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

## Customer Reviews

Text: English (translation) --This text refers to an out of print or unavailable edition of this title.

Wendy Doniger holds doctoral degrees in Indian literature from Harvard and Oxford Universities and is the Mircea Eliade Professor of the History of Religions at the University of Chicago. Her publications include translations of The Rig Veda and The Laws of Manu for the Penguin Classics,

and the acclaimed Kama Sutra for OUP.

I am fairly unfamiliar with Hindu mythology, so I was very excited to get this collection. I can't speak for the translation job, but it was an enjoyable read.

good

Very hard to follow at times. Came promptly and was in great condition but was disappointed with the actual book. There's probably a better Hindu Myths book that isn't so hard to understand or to follow.

Very good specific read

I ordered this book for a class im taking and was thrilled when i received it. Although i received an older version of the book all the same information was present in the text so i didnt mind. The book was also very well maintained and looked like one of those old library treasures that was hidden on some shelf for many a year until just recently found... nonetheless very happy. Oh and the myths in the book are pretty interesting too; its a fun read that can make you think.

It came on time and it was in very good condition! almost brand new. it came faster than i expected.

The single greatest book on Hindu mythology ever. Don't waste your time with any other source.

The organization of the book makes it a great reference book, but if you desire to read the vedas from beginning to end, this book is not it. The prose translation captures the facts fairly accurately, though it does lack information on how these Myths manifest itself and how these myths came to be. As the title suggests, it is really meant to be a source book for research and quick reference. Gods and demons are broken into sections, so if you need to find the samasa veda text regarding visnu, this book will make critical writing a joy and allow you to focus on the essay instead of searching the library for a short paragraph.
