I absolutely love the We Both Read book series! This is a great way to spend time with your child learning to read. One page is for parents and the other is for the child. You can make it a little more challenging as your child's reading level advances having them try to read the parent page. I would recommend this book and any other in this series to everyone with a child learning to read.

Actually I am unable to rate this because it was a Christmas gift to my 11 year old grandson - haven't heard what he thinks of it.

Another nice introduction to the sciences for young children. The book has clear, colorful pictures on

each page and the text contains much information presented in a simple, interesting way for young readers. Nice pages in the back that help with the vocabulary, too. Great addition to any family library!!

My 5 year old loves dinosaurs and loves this book! The We Both Read books are lots of fun for kids. I have a teenager who enjoyed them when he was little.

The book is one of my son's favorites, it is in mint condition and buying it online saved me hours of driving around and searching bookstores.

A basic education about dinosaurs for the first or second grader, About Dinosaurs is well written and well illustrated. As one of the We Both Read series the left pages contain more difficult words and background information while the right pages have both smaller and fewer words. This design is so reading can be a family experience with the parent reading the left pages and the child the right pages. The final two pages of the book include a dictionary and a section on word roots. About Dinosaurs is educational while still being fun and a recommended children's book.
